

NAUTITECH[®]

DEVOTED TO SOLUTIONS IN HAZARDOUS AREAS

Who We Are

Our vision is simple. We want to innovate, collaborate, and engineer solutions that drive better communication and increase productivity and safety in hazardous areas underground

Aga Blana,
Managing Director

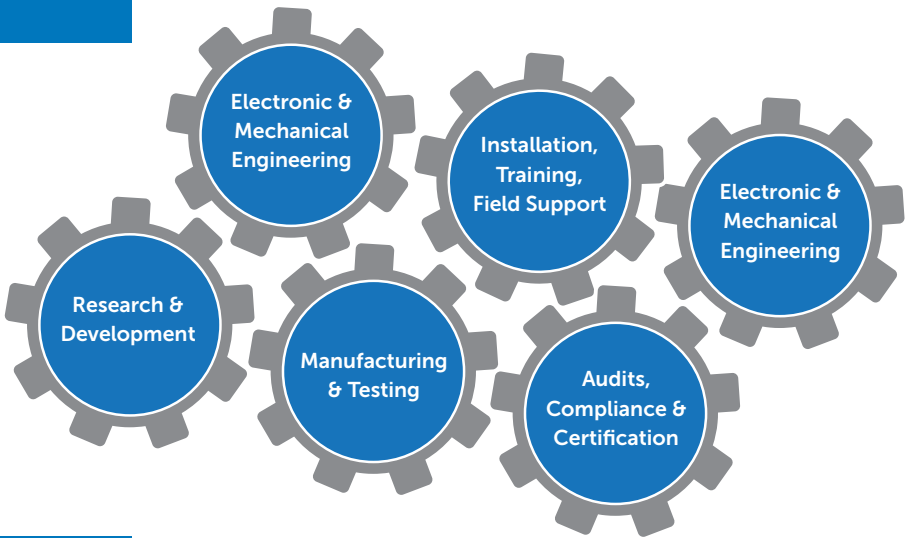

Our experience with European, American, and Australian OEMs ensures that we have the ability to combine innovation and commercial acumen to help overcome some of our clients' biggest operational challenges

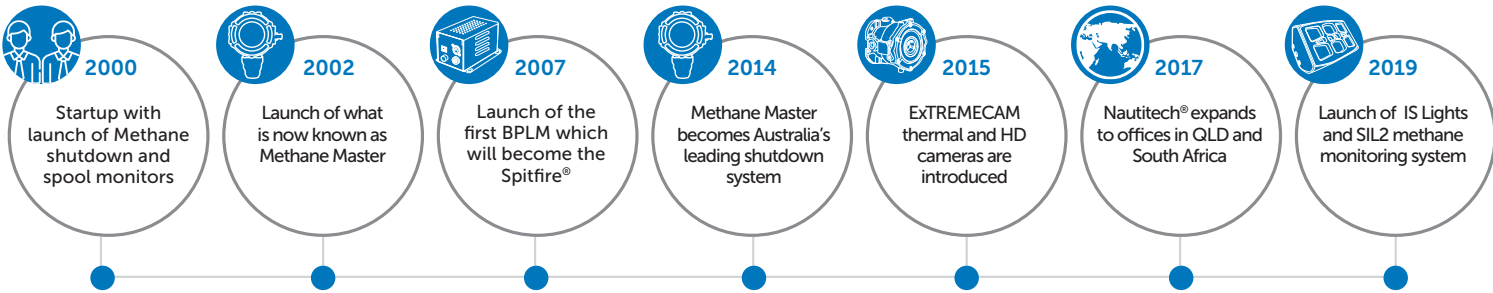

Mac Powolny,
General Manager

Our Core Competencies

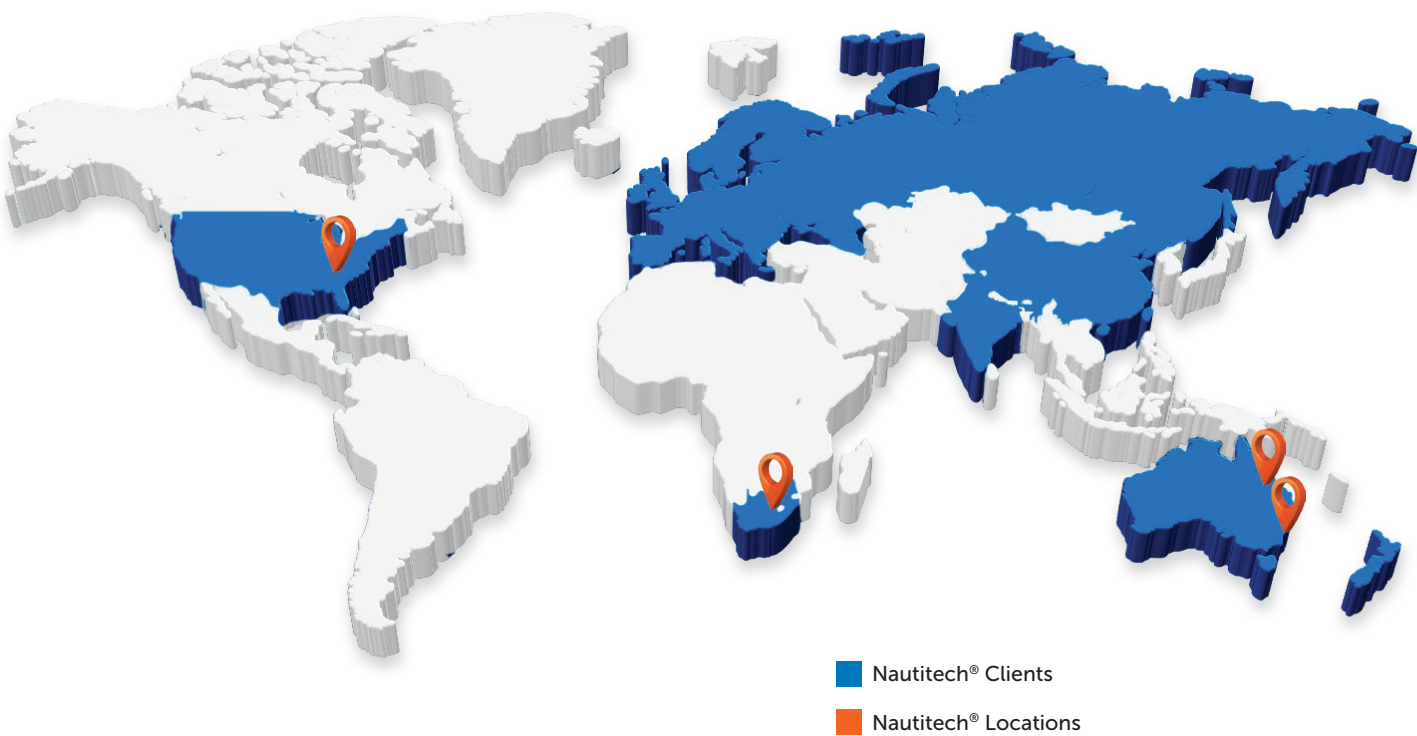

Nautitech® offers full product life cycle support and all our products are designed, engineered, and manufactured in Australia to the highest international standards.

Our History

Collaborations

At Nautitech® we believe that collaboration with other METS organisations, academia and industry bodies allows us to be in-the-know with what the industry requires. We are proud of our association with:

Certifications

We are an IECEx certified manufacturer, NATA accredited, and qualified to ISO 9001:2015 quality management standards. Our hazardous area equipment is licensed by recognised worldwide industry bodies and we are AS3800 certified for repair and overhaul of Ex d and Ex i equipment in-house

Sustainability

As a manufacturer, we recognise the importance of minimising our environmental footprint and have taken steps to do so through good business practice

Solar Roof Panels

Energy Efficient Lighting

Battery Recycling

Metal Waste Recycling

Recycled Packaging

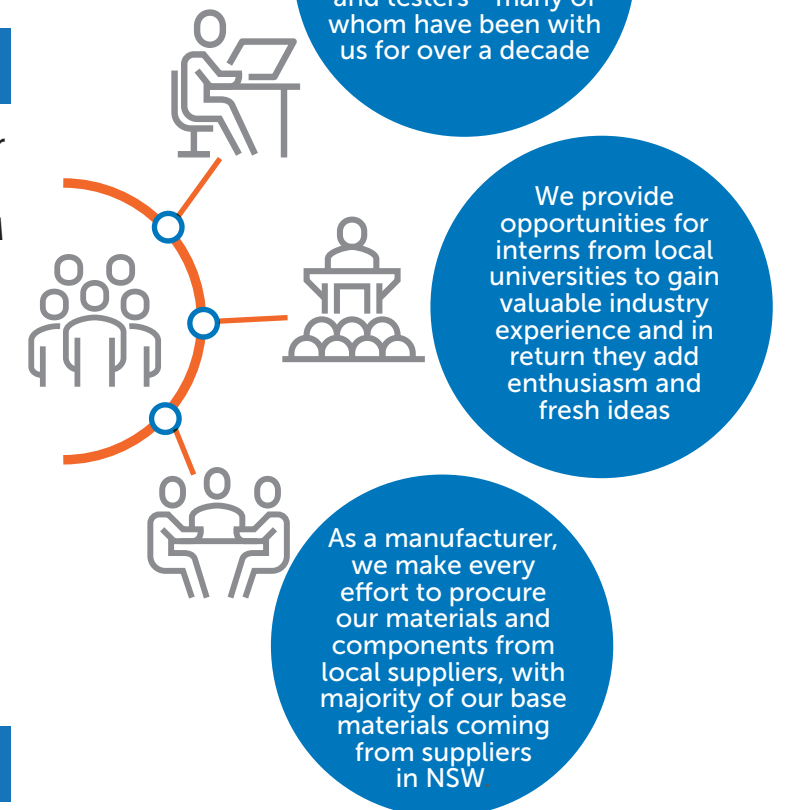

Awards

Over the years we have been recognised by both peers and industry bodies for our contribution to the underground mining industry. Some of our achievements include:

People & Community

As a corporate citizen, we believe it is our responsibility to provide opportunities to our staff, to promote the growth of STEM careers and truly be a community player, starting with our local community

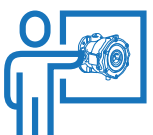

Networking

We believe in being proactive when it comes to increasing our industry knowledge. This is why you'll find us at most industry events and seminars, interacting with the industry's foremost professionals and building a deeper understanding of the latest developments

By partnering with OEMs, mining companies, universities and research organisations in the areas of product testing, research and development, we are able to continuously improve and adapt our products to ensure they're perfectly tailored for the current needs of the industry

You'll often find someone from Nautitech® presenting at an underground mining event or demonstrating our products. We love sharing our learnings with colleagues in the industry and also hearing from our clients about the environmental conditions they face
